

Competitor Deep Dive: Tandem vs GridWork vs Flowdesk

Overview

This deep dive compares Flowdesk against Tandem and GridWork across the capabilities that most influence enterprise evaluations.

Identity & Access

Both Tandem and GridWork ship SSO/SAML and SCIM. Flowdesk currently does not, which blocks company-wide rollouts for customers like Northwind Trading and Cobalt Health.

Search

GridWork offers global search across workspaces. Flowdesk search is scoped to a single workspace, a frequent source of customer frustration.

Threat Assessment

We are most exposed in enterprise deals requiring SSO and cross-workspace search. Closing these gaps is the highest-leverage competitive move.
